

# Militia Overview

First Download the overview profiles from here....[Militia overview](#)

Once you've done that, locate your downloaded file and place it into your EVE Overview folder which is in;

*\$:Documents and Settings%User name%My DocumentsEVEOverview*

Where \$ is the letter of your windows installation and %User name% is your account name in windows.

If you don't have the overview folder in "My Documents" you will have to either make one or export your current overview,

which will make the folder for you. Once the folder is there just drag and drop.

Now open EVE client and at the top of your overview, click the little white arrow and scroll down to;

*"import overview settings"*

Now import "**Militia Overview**"

Great that's you got your overview almost setup, next you have to change some setting yourself by following the screenshots below.

The 5 tabs that are on your overview can be changed to many specialist tasks, feel free to mess around with them.

If you mess it up just repeat the steps above.

Enjoy !!!

OVERVIEW SETTINGS

FILTER APPEARANCE COLUMN SHIP MISI OVERVIEW TAB

Change displayed state by selecting it, change color by right clicking and modify priority by moving up and down.

APPLY TO SHIPS AND DRONES ONLY

Thought I'd post my screen layout for you too.

This setup was made and brought to you from [HIRAZORIII](#) on behave of [Amarrian Retribution](#).
